DETAILED ACTION

Allowable Subject Matter

Claims 1-3, 5-7, and 9-12 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-3, 5-7, and 9-12 is the inclusion of the limitations of "control circuitry for controlling operations of the printer and recording the calibration position of the track, the control circuitry comprising a counter for recording a counted position of the second portion of the position detecting mechanism; wherein the calibration position is within a range which the print head is capable of printing the medium, and the second portion is capable of passing by the first portion when the print head simultaneously ejects ink onto the medium; wherein when printing the medium, if a difference between the position of the second portion corresponding to the track recorded by the counter and the position of the calibration position at the track recorded by the control circuitry is within a first predetermined range, the control circuitry does not need to calibrate the position of the carriage." It is these limitations found in each of the claims, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
